

Marine Revolution SW 2400

The Smartwave 2400 rigid tender has been developed for today's lifestyles, recreations and people. These boats are moulded from U.V stabilized polyethylene which makes them safe, strong, lightweight and virtually indestructible. Motor and oar provisions give them maximum versatility as yacht tenders, pleasure boats and fishing dinghies. The TRI Hull design gives unrivalled stability, steerability and buoyancy. The SW2400 has a sturdy bow towing eye that can be used to secure the boat during storage and a self draining bung system that allows the boat to drain if left on a mooring or the beach. For ease of transportation, this tough little dingy fits easily on car roof bars.

Smartwave boats are designed to give the safest, smoothest and most enjoyable experience on the water.

Specifications

Length	2.4m (7.9ft)
External Beam	1.3m (4.3ft)
Hull Weight	45kg (99lbs)
Max Horsepower	5Hp
Max # of People	3
Hull Material	Polyethylene
Warranty	5 years

Virtually indestructible, un-sinkable and maintenance free, Marine Revolution boats are your first choice in safety and durability. Rotationally moulded in top quality virgin grade polyethylene thermoplastic, Marine Revolution boats offer unrivalled hull thickness, positive buoyancy and a hull up to five times stronger than fibreglass. The Polyethylene contains powerful ultra violet stabilisers designed to survive in harsh environments. It is impervious to osmosis, corrosion, rot and rust and has no gelcoat or paint to maintain. A range of colour options for the hulls and cabins are available.

Marine Revolution boats also have the distinct advantage that they are fully recyclable. An important feature in a world where we are conscious of our impact on the environment.

The use of computer controlled equipment and the ability to mould in one-piece, double skin, without any structural stress points is a unique process. This process ensures quality and consistency is maintained at the highest level.
